

Buff Brite started from a necessity like all great products do. One day our founder was buffing when a light overhead flickered out. Out of laziness he decided not to drag out a ladder and after many failed attempts of other lighting sources he grabbed an LED handheld shop light and duct taped it to the end of his polisher. Four years later, 10 prototypes and 2 patents we have the Flamethrower. Get one and take your polishing to the next level !!!

## FLAMETHROWER

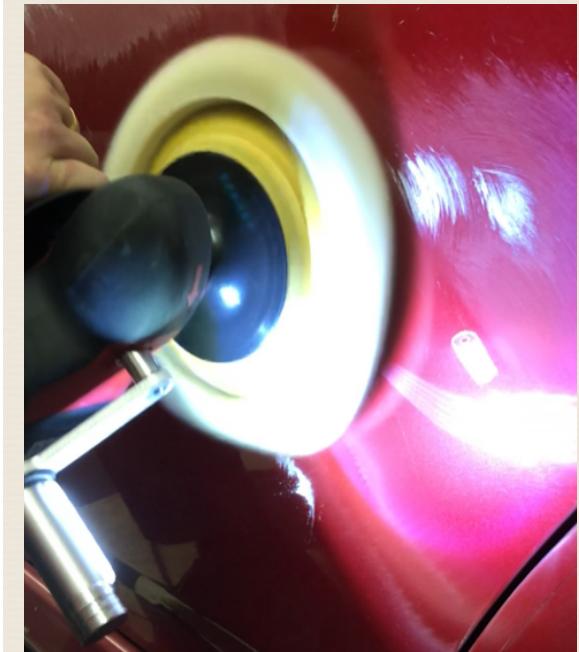

The Flamethrower was invented to solve a huge problem in the polishing industry, not having enough light to see the imperfections you need to repair. Now anyone can get perfect results every time because when you have better Light it gets done Right.

Contact us today and get the “best tool you didn’t even know you needed.” Let the Flamethrower outshine your expectations!!!

# BUFF BRITE FLAMETHROWER

Are you tired of polishing to, what you think, is a perfect shine and then pulling the car outside into the sun only to find there were numerous problem areas you missed. We have all been there and now there is a perfect, low cost, solution to the age old problem. By putting 800 lumens of intense cool blue LED light right on your work area there will never be a missed scratch again.

#### **UNLIT FLAMETHROWER: 29.99**

Perfect if you have your own light to mount in its anti vibrational mount. This option also lets you hang the polisher on a hook for storage while you charge your light. A great low cost way to solve a polishing problem. Includes all mounting hardware.

Arm , Dampener and  
Hardware

Using the arm to hang the  
polisher while charging

#### **FLAMETHROWER: 59.99**

Same as the Unlit Flame-thrower but with the amazing 800 lumen cool blue Flamethrower light. Can be mounted on either side of the buffer or on the front as shown here. Can also be articulated to the front or back of the buffer for best lighting to fit your needs. Comes with all the hardware to mount to any polisher of your choice.

Single light, Arm and  
Hardware

Center Mounted Light

#### **DOUBLE FLAMETHROWER 89.99**

For those who want to bring the Noon Day Sun to their polishing work this is the one for you. All the goodies of the single unit including the hardware. Also a cheaper way to outfit two separate polishers if that's what you desire. You can polish in the dark if you really want a challenge.

Two Times the Fun!!!

Dual Mounted Flamethrower
